

# Induction

Marwa Gadala

January 23, 2026

CS2HCI: Human Computer Interaction

**UNIVERSITY  
OF THE YEAR  
2020**

The  
Guardian

# Presentation Outline

- Introductions
- Module Learning Outcomes
- Why Human Computer Interaction
- Module Content
- Module Schedule
- Module Assessments
- Module Feedback

# Introductions

- **Module tutors:**

- Dr. Marwa Gadala
- Email: [m.gadala@aston.ac.uk](mailto:m.gadala@aston.ac.uk)
- Dr. Lilit Hakobyan
- Email: [l.hakobyan2@aston.ac.uk](mailto:l.hakobyan2@aston.ac.uk)

- **With further support from:**

- Abinaya Sowriraghavan
- Ai Salt

# Module Learning Outcomes

- On successful completion of the module, students should be able to:
  - LO1: Apply contextually relevant discovery techniques for **knowledge elicitation** during user interface design processes
  - LO2: Adopt and apply **user-centred design (UCD) methods to the design of user interfaces**, demonstrating empathy with end users and their needs
  - LO3: Apply appropriate **practical evaluation methods to analyse and evaluate effectiveness of user interfaces**, with specific focus on usability, based on an informed understanding of human computer interaction principles and related concepts
  - LO4: Establish and deploy strategies that lead to ongoing **personal skill development**, including those that relate to **empathetic response to user needs** during design, **effective group/teamwork**, **effective communication**, **critical analysis**, and **self-directed knowledge expansion**

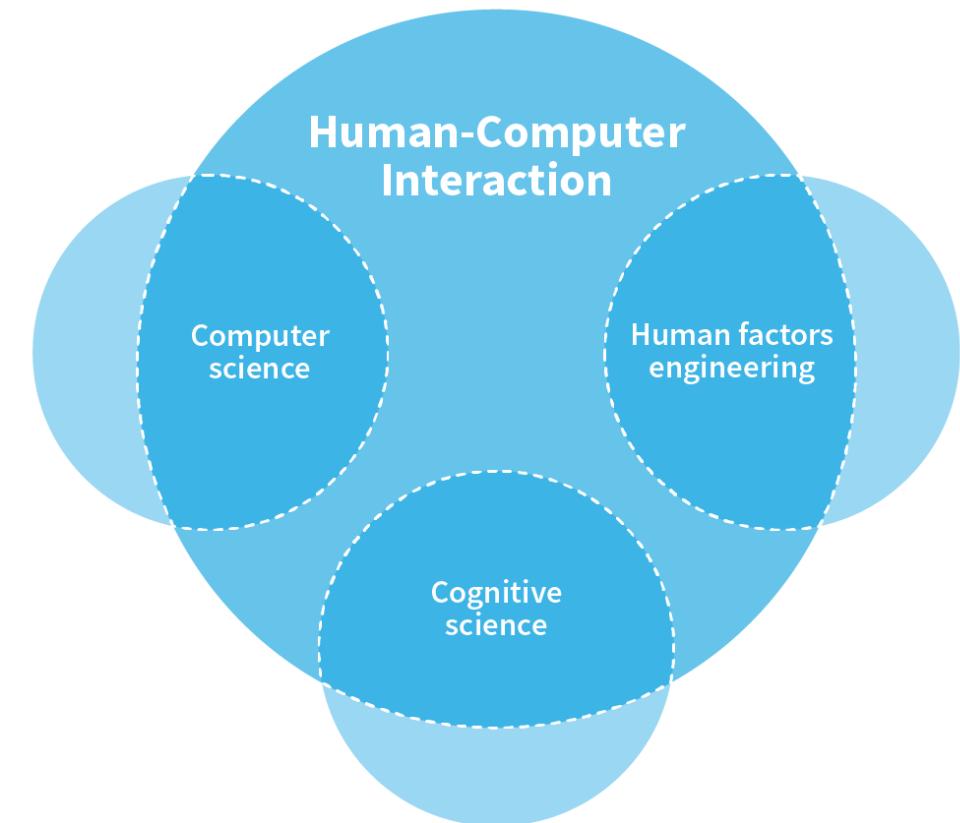

# Module Aims

- Module aims for students to:
  - Have a clear, foundational understanding of **human performance** as it relates to **human computer interaction (HCI)**
  - Be able to practically and effectively engage in **knowledge elicitation** activities for the purpose of informing user interface design
  - Have a clear appreciation for the need for, and be able to practically and effectively engage in, **user-centred design (UCD) of user interfaces**
  - Be able to practically and effectively engage in **usability evaluation** of user interface designs

# What is HCI?

- “Human-computer interaction (HCI) is the discipline concerned with the **design, evaluation, and implementation of interactive computing systems for human use** and with the study of major phenomena surrounding them”  
*(Hewett et al., 1992)*

## The Multidisciplinary Field of HCI

# Addressing user needs

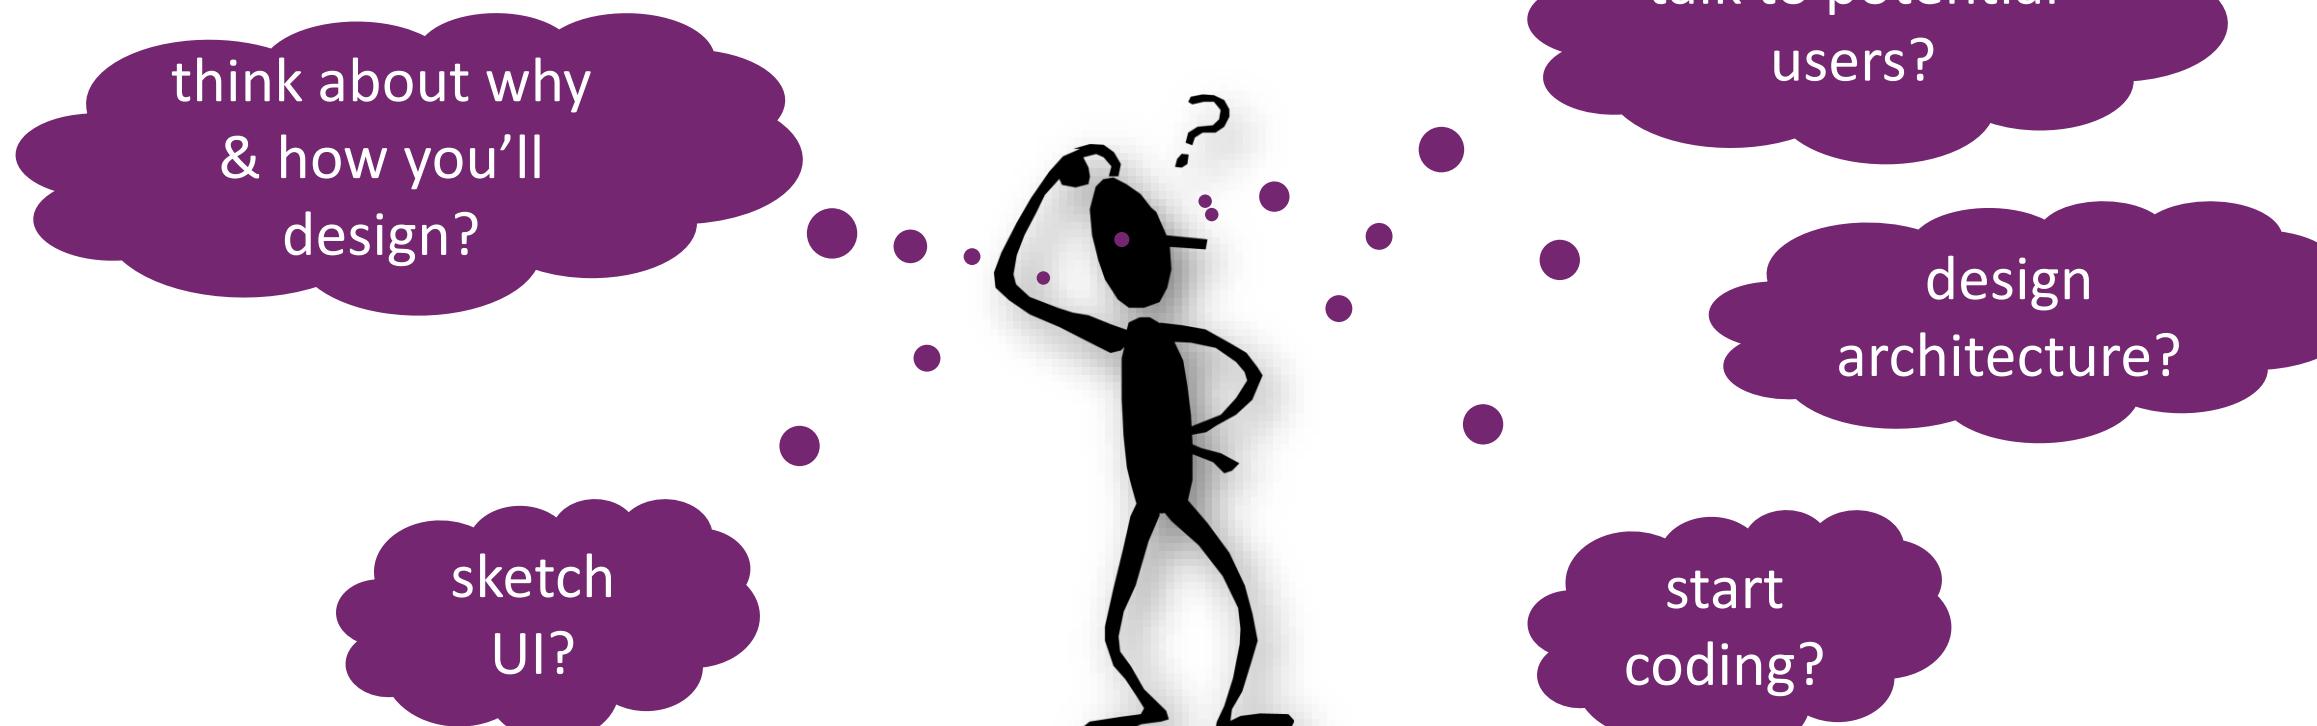

Image credit: <https://developers.google.com/assistant/conversation-design/test-and-iterate>

# Where to start?

- Imagine you have been asked to design an app to help students improve their productivity
- ...what would you do? ...**where would you start?**

think about why  
& how you'll  
design?

sketch  
UI?

talk to potential  
users?

design  
architecture?

start  
coding?

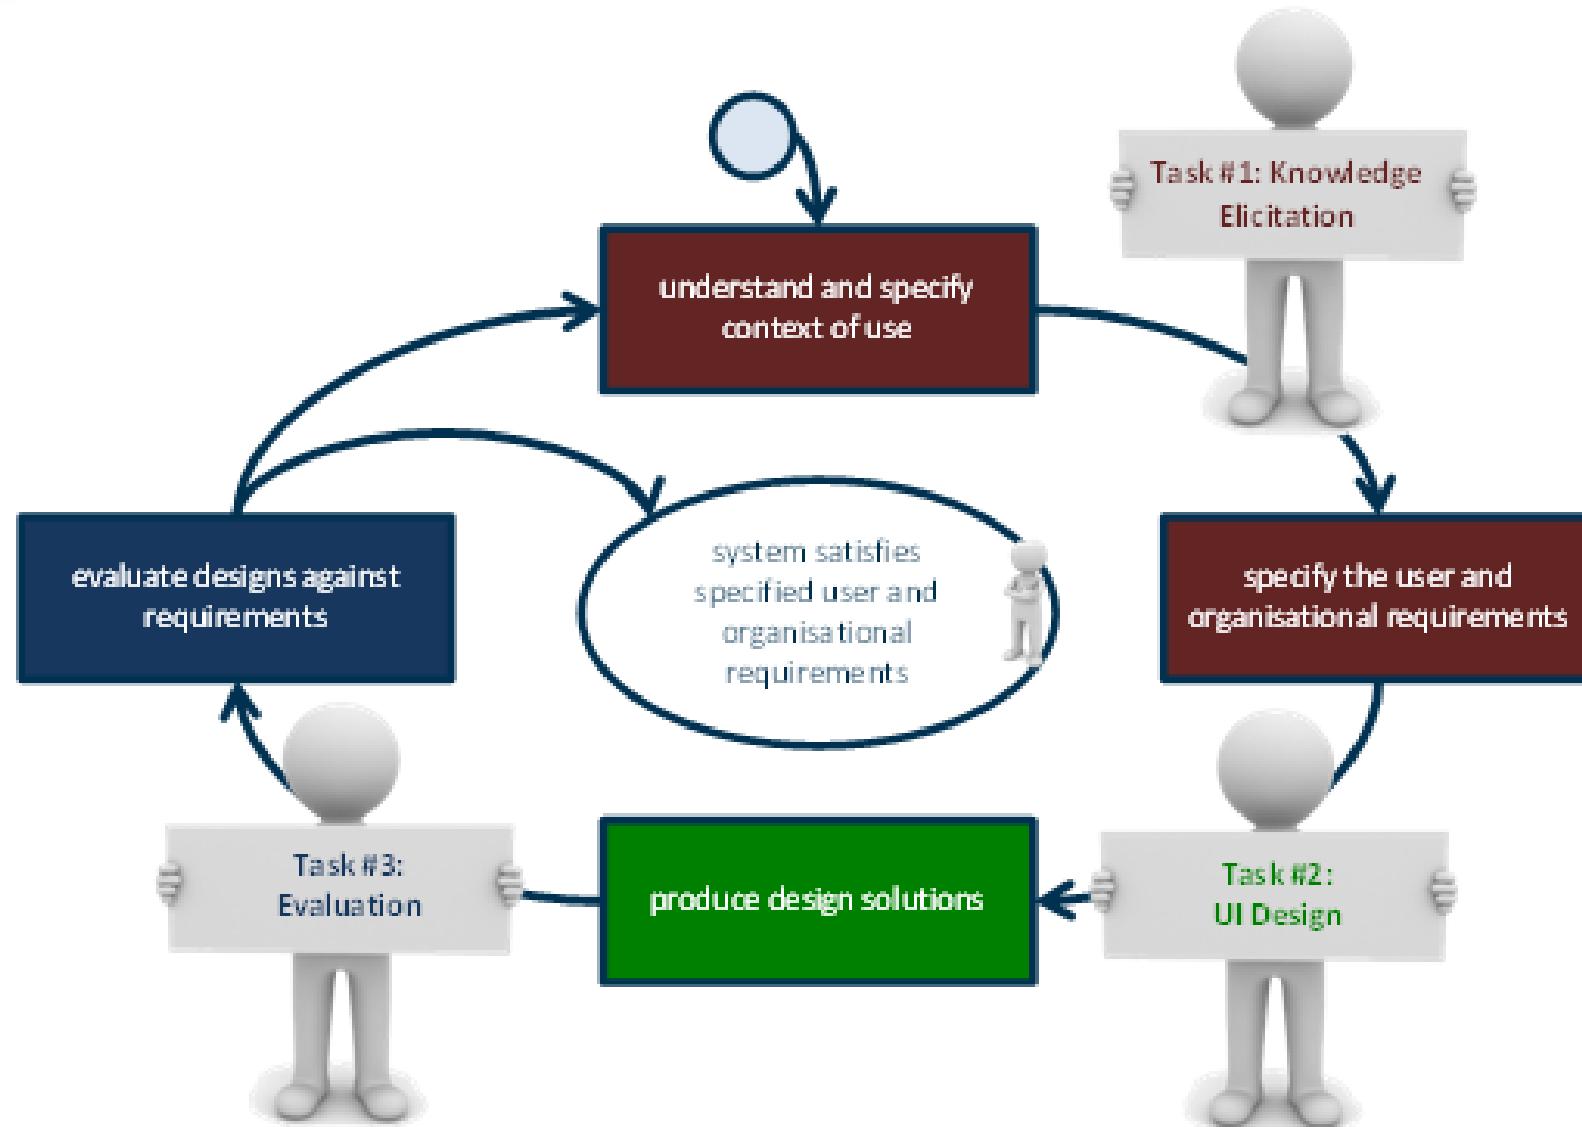

# Why is HCI important?

- Helps **prevent errors**, which can be fatal in safety critical domains
  - Example: Air France crash (*de Wit, P.A. and Cruz, R.M., 2019*)
- Convinces users to use/**accept** your product
  - 70% of online businesses fail because of poor user experience (*Uixeria*)
- Helps prevent/reduce **costs** associated with **post-release fixes**
  - “Fixing a user experience issue after development is 100 times more expensive than fixing it during design” (*IBM*)
- Helps reduce **costs** associated with **customer support**
  - “Companies that prioritise UX see lower customer support costs by up to 90%” (*Uixeria*)
- **Retains** existing **customers** and brings in **new** ones

*When technology is not designed from a human-centered point of view, it doesn't reduce the incidence of human error nor minimize the impact when errors do occur.*

*(Norman, 1993)*

# User-Centred Design

# Module Content on Blackboard

- Introduction to HCI (1)
- Understanding the User (3)
- User-Centred Design (1)
- **Knowledge Elicitation (2)**
- **Prototyping**
- **Usability Evaluation**

# Module Schedule

- Always check your **Timetable** for updated times and locations
- Any necessary **changes** to the published schedule will be communicated via **Announcements** on BB
- Downloadable and printable **pdf** schedule is available on BB

CS2HCI Schedule 2026

Week #	Week Beginning	Teaching Hour #1	Teaching Hour #2	Teaching Hour #3	Teaching Hour #4
18 (1)	19/01/2026	 Induction Lecture*		Independent Learning Introduction Lecture Understanding the User Lectures 1, 2, 3 UCD Lecture Knowledge Elicitation Lectures 1, 2	
19 (2)	26/01/2026				
20 (3)	02/02/2026		Knowledge Elicitation Planning Session*		Knowledge Elicitation Planning Session*
21 (4)	09/02/2026			Knowledge Elicitation Field Work	
22 (5)	16/02/2026		Knowledge Elicitation Analysis Session*		Knowledge Elicitation Report Writing Session*
23 (6)	23/02/2026		KE Report Submission <b>Feb. 24, 2026</b>		Independent Learning Prototyping Lecture
24 (7)	02/03/2026		User-Centred Design Session*		User-Centred Design Session*
25 (8)	09/03/2026		Design Group Presentations <b>Week of March 9th</b>		Independent Learning Usability Evaluation Lectures
26 (9)	16/03/2026		Usability Evaluation Planning Session*		
27 (10)	23/03/2026		Usability Evaluation Planning Session*		
			Easter Vacation		
	04/05/2026		Usability Evaluation Report Submission <b>April 30, 2026</b>		

\*On-Campus session. Check your timetable regularly for time/date/location of these sessions which could be subject to change

# Module Assessments

- Assessment is by **coursework-related** activities only and is **continuous** throughout the module
- Activities naturally follow on from each other. So it is important to **engage** from the start!

Assessment	Deadline	Weight
Knowledge Elicitation Report	24/02/2026 @ 13:00	35%
UI Design Presentation	Week of 09/03/2026	15%
Usability Evaluation Report	30/04/2026 @ 13:00	50%

\*Always check BB for assignment details and deadlines

- Expectations for what you deliver are **high** and components will be marked accordingly!

## Computer Science: Code of Conduct for Classes

**Please be on time:** respect teaching staff and your fellow students by arriving on time

**Respect and engage:** with your team, from the beginning, and in all stages of the module

**Actively participate:** teaching sessions are important for your learning so take responsibility, take part, and ask questions

# Module Feedback Strategy

- Teamwork sessions
- Coursework feedback
- Office hours
- Email

# Design Brief: Sustainability Shopping Assistant

- Today, consumers are becoming increasingly more aware of:
  - the **carbon footprint** associated with the products they buy,
  - the excess use of **non-recyclable packaging** materials used,
  - and the **sustainability** of food sources
- At the same time, they are often **time poor** and may not always have the capacity to scrutinise all food products to make the best, most informed choices.
- “**Sustainability Shopping Assistant**” is to be designed to help customers make more environmentally sustainable choices when shopping

# A \*Window\* into the Context of your Coursework Brief

- Core requirements include, but are not limited to, the ability for a customer to scan a selected item and:
  - receive information about its **sustainability attributes** – e.g., carbon footprint, packaging used, and (where applicable) whether it has come from responsibly managed, sustainable stocks;
  - receive a **rating** of the product relative to its **sustainability attributes**;
  - receive a **recommendation** for another product of the same type that would be a better choice for the customer in terms of sustainability;
- **See BB for full assignment brief and list of requirements**

# Module Evaluation

- **Responses/Actions taken:**

- Schedule independent learning ✓
- Address individual contributions ✓
- Include design-related material ✗

*I like the fact that there is no exam and a lot of teamwork is encouraged.*

*I always get detailed and accurate feedback.*

*The content is interactive and challenging.*

# Thank you

- Questions?
- Please remember that today's slides and brief overview of the assessment are **not substitutes for careful reading of the assessment brief** to ensure you clearly understand all that is required
- Please pay special attention to module **announcements** and **Blackboard Page** for key module **updates** and information
